

Power Automate workflow :

ingesting email content -> downloading the attachment from files -> uploading that files to Google Drive location

Python Code :

```
from google.oauth2 import service_account
from googleapiclient.discovery import build
from googleapiclient.http import MediaIoBaseDownload
import pandas as pd
import io

# CONFIG
SERVICE_ACCOUNT_FILE = r"C:\Users\Akash\Documents\gen-lang-client-***** "
SCOPES = ['https://www.googleapis.com/auth/drive.readonly']
FOLDER_ID = '1Mpr6QUpG0Imrlrgzzos*****'

# AUTHENTICATION
credentials = service_account.Credentials.from_service_account_file(
    SERVICE_ACCOUNT_FILE,
    scopes=SCOPES
)

service = build('drive', 'v3', credentials=credentials)

# LIST FILES
def list_files(service, folder_id):
    results = service.files().list(
        q=f'"{folder_id}" in parents',
        fields="files(id, name, mimeType)"
    ).execute()
    return results.get('files', [])

files = list_files(service, FOLDER_ID)

# DOWNLOAD + READ FILES
file_dataframes = []

for file in files:
    file_id = file['id']
    file_name = file['name']
    mime_type = file['mimeType']

    try:
        if mime_type == 'application/vnd.google-apps.spreadsheet':
            request = service.files().export_media(
                fileId=file_id,
                mimeType='text/csv'
            )
            elif mime_type in [
```

```

'text/csv',
'application/vnd.openxmlformats-officedocument.spreadsheetml.sheet'
]:
request = service.files().get_media(fileId=file_id)
else:
continue

fh = io.BytesIO()
downloader = MediaIoBaseDownload(fh, request)

done = False
while not done:
_, done = downloader.next_chunk()

fh.seek(0)

if mime_type ==
'application/vnd.openxmlformats-officedocument.spreadsheetml.sheet':
df = pd.read_excel(fh)
else:
df = pd.read_csv(fh)
